Developing e-learning Resources using Camtasia Studio

Have you ever found yourself giving the same lecture or answering a question over and over again? Perhaps you have students who need to be able to rewind or pause the lecture in order for them to follow the lesson, or how about giving your students the option to jump to a specific part of the lesson without having them to watch an entire instructional video? Instructional videos can make information accessible to diverse learners and are a great way to save yourself valuable time and provide concrete examples and information to your students.

In this online module cum research study, you will learn to create effective video-based learning for your course. You will learn to capture your screen, add voice narration, text call-outs, annotations and other media files such as animations and images, and learn editing techniques to produce a professional online video.

By the end of the online module cum research study, you will be able to:

- apply the principles of multimedia design into presentation slides
- record a lecture using Camtasia Recorder
- add content to a Camtasia Studio project
- apply editing techniques; and
- share and produce a video file.

This **fully online** module cum research study comprises learning on demand videos, hands-on exercises, online discussions, and a post-course survey, all of which will take **1.5 hours** to complete. Upon registration, this module will be open for 2 weeks for you to conveniently access at your own pace and time.

We would also like to inform you that CDTL is currently studying the potential of fully online professional development workshops to support engaging, meaningful professional development for academics, while accommodating their needs for convenience and flexibility.

Hence, this online module cum research study is open to 30 academics and academic developers, aged at least 32 years old, who teach at the National University of Singapore. Your participation is highly appreciated as your feedback will be used to further develop and refine the online module. Future versions of this module will be made available to all academics.

If you decide to take part in this module cum research project, you will do the following:

Activity	Duration
Go through the videos on “ Developing e-Learning Resources Using Camtasia Studio ” and hands-on exercises individually	1 hour
Participate in the online discussion in LumiNUS	15 minutes
Take an anonymous post-course survey	15 minutes
Total duration	1 hour 30 minutes

If you have any queries, please contact Charina Ong, at 6516 4560 or email: charina.ong@nus.edu.sg.
