

Satyen Gautam

Dept of Chemical & Biomolecular
Engineering
Faculty of Engineering

My teaching philosophy is based on the belief that education is a progressive journey of becoming better. Education provides students with knowledge and skills that enable them to synthesize new ideas, critically evaluate situations and make informed decisions. As educators, it is our responsibility to strive for excellence in students and ourselves. My method of teaching encompasses the following:

Students' engagement in the learning process is crucial

Conceptual understanding is key to developing good problem solving skills.

Communication skills are vital for students' academic, personal, and professional success.

Fair grading policies and a positive learning environment are essential components of education.

What Students Say...

"DrGautam is a passionate teacher who strongly believes in ensuring that his students have a good grasp of the fundamental concepts..."

"He promotes the culture of sharing and helping peers.... Fantastic source of inspiration as a mentor, motivating students to appreciate the need to think, apply and justify decisions."
